However, a day later, the IMD had raised questions about the accuracy of the sensors. "It could be due to an error in the sensor or the local factor. IMD is examining the data and sensors," the weather agency had stated. The continued heatwave conditions in several parts of the country, especially

the northern region has claimed 54 lives so far. Worst affected places such as Delhi, Punjab, and Odisha have been logging maximum temperatures above 45 degrees Celsius over the last few days. Twelve people died of suspected heatstroke in Odisha's Sundargarh during the past 24 hours amid sweltering heat, news agency IANS reported. According to Press, four people, including a woman, were killed due to heatwave-related
